**HYVE 200**

## The HYVE

The HYVE was born out of a vision to create innovative outdoor spaces where agile working practices integrate seamlessly with personal wellbeing

**Simple** – a modular design which maintains the inherent classic beauty, core strength and functionality

**Versatile** - fully fitted out to enable a healthier outdoor lifestyle

**Eco friendly** – sustainable materials and methods to care for the wellbeing of the environment too

**Quick** - short delivery times and off-site manufacture for minimum install impact

**Complete** – managing every detail from start to finish.

### **HYVE 100**

An iconic hexagon style which stands apart from the norm. Designed as individual spaces which can be simply clustered or interlinked together.

### **HYVE 200**

The classic square cornered space, available in many sizes.

### **HYVE 300**

Combining the best of both worlds – large open areas with smart contemporary corners.

### HYVE Office

Due to the simplicity of staying connected with clients and colleagues many busy people now choose to work remotely or from home.

Adopting this workstyle brings many benefits such as improved health, extra time with family and saving the expense and environmental impact of a long commute.

The HYVE Office provides a fully connected space where busy professionals have everything they need to work efficiently separate from the home environment.

Model	Regular sizes
Office 100	1.8m x 2.0m
